Panayiota Th. Atteshli and her father Dr. Stylianos Atteshli

Twenty-one years ago, on the 26th of August 1995, my father left his material body on earth and went to live in the very high heavenly spheres.

In commemoration of his teaching and the greatest and most beautiful gift he implanted in me, I would like to start my first seminar in London with one of the lessons that touched me deeply. It showed me the stream of Light to follow that will always keep me on the right path.

Whenever I study, meditate or work in healing, I feel and realize the meaning of every word he said flowing and spreading in my BE-ingness, in my existence as a personality and in my material body like healing living water.

The Logos-Christ vitality is everywhere and in us. It heals everything. The only thing we have to do is to acquire a certain knowledge concerning us, to fully attune our Self to HIS power and let the healing living water run freely in us.

This healing living water has the power to sweep away everything that should not be in our personality and material body, and it can heal us, provided we cooperate and do our part in the healing process.

Heal Me!

Many people came to my father asking him to heal them. At that time, I didn't know why he started smiling whenever he heard them say that.

Now many are coming to me saying the same thing. I don't know if my father was thinking and smiling in the same way as I am thinking and smiling now, when I hear the people say: "heal me!"

Sometimes I wonder if people really believe that I am able to play the role of God. I believe they forget that I am a human being like they are. I will be very happy if one day someone comes and doesn't say: "heal me," but rather "Panayiota, can you please tell me how I can understand and work better with my personality-self and how I can heal my body?"

Now I want to clear a few things. One thing is to become a clinical therapist, another thing is to become a psychical therapist or healer and again another thing is to become a spiritual healer.

Based on the teachings of my father, Dr. Stylianos Atteshli the seminar will give an introduction and overview of the major aspects in healing work.

During the three days, we will focus on the main points mentioned below that should be respected and followed in Healing. Different lectures will facilitate the theoretical understanding and relationship, exercises and meditations will help experience and practice.

- Know who you are as a real Self.
- What is Love?
- Become a pure channel of the Christ-Logos and of the Holy Spirit.
- Control thoughts and emotions.
- The ethers
- Visualisation
- Love the patient and help, guiding him/her out of their problems.
